the kibble cats love™

Dr. Elsey's cleanprotein™ for All Cats

Protein is an important nutritional profile in your cat's diet, with animal proteins having the highest biological values (BV) as compared to grains, fruits and vegetables. Dr. Elsey's cleanprotein™ helps support a healthy, active lifestyle for all cats.

Making the Healthy Choice - The Proof Is in the Protein

As cats age, they absorb and metabolize protein less efficiently — therefore, it's extremely important to feed high quality protein. High protein can help maintain lean body mass and support a healthy immune system.

High Protein Supports Body Condition - With Added Vitamins, Minerals & Other Trace Nutrients

High levels of protein help satisfy your cat's appetite to maintain a healthy body weight. Protein is metabolized slower than other nutrients so the result is an appetite that is satisfied longer.

High Biological Value Protein

The primary ingredients in Dr. Elsey's cleanprotein™ are among the highest biological value proteins available. Cat foods that use plant-based carbs such as grains, legumes or starches, lead to rapid metabolism, which increases your cat's hunger. Inspired by the protein levels found in natural prey, Dr. Elsey's cleanprotein™ helps your cat maintain an ideal weight and body mass.

Ingredients

Hydrolyzed Pork, Pork Plasma, Dried Chicken, Chicken Fat [Preserved with Mixed Tocopherols], Gelatin, Ground Flaxseed, Natural Flavor, Calcium Carbonate, Salmon Oil, Potassium Citrate, Choline Chloride, Potassium Chloride, Fructooligosaccharides, Vitamins (Niacin, Vitamin A Supplement, Thiamine Mononitrate, d-Calcium Pantothenate, Folic Acid, Pyridoxine Hydrochloride, Riboflavin, Vitamin D Supplement, Biotin, Vitamin B12 Supplement), Magnesium Oxide, Taurine, Minerals [Zinc Proteinate, Zinc Sulfate, Iron Proteinate, Ferrous Sulfate, Copper Proteinate, Copper Sulfate, Manganese Proteinate, Manganese Sulfate, Calcium Iodate, Sodium Selenite], Mixed Tocopherols (Preservative), Salt, Rosemary Extract, Vitamin E Supplement.

Grain-Free | No Fillers or Artificial Preservatives | With Omega-3 Fatty Acids

Recommended Daily Feeding

Please use the information below as an initial recommendation only and adjust as needed based on age, size and activity level.

3-5 lb	1/4 - 1/3 cup	31-44 gm
6-11 lb	3/8 - 5/8 cup	49-74 gm
12 lb & up	5/8 - 3/4 cup	79-93 gm

Offer up to four times the recommended daily feeding during gestation and lactation. Offer up to two times the recommended daily feeding for kittens.

Making the transition from your cat's current food should be gradual to prevent any digestive upsets. Allow 7-10 days to make the transition by adding a little more Dr. Elsey's cleanprotein™ each day and decreasing your current cat food.

Dr. Elsey's cleanprotein™ Pork Recipe is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for All Life Stages.

Calorie Content (calculated) - Metabolizable Energy: 3,965 kcal/kg, 492 kcal/cup.
