

cleanprotein™

Feeding your cat appropriate amounts of all meat protein is essential to help maintain a healthy body weight. Reward your cat with Dr. Elsey's treats knowing that you're providing a healthy, delicious all-meat option.

Single Ingredient. Your cat deserves it.

Dr. Elsey's cleanprotein™ for All Cats

Protein is an important nutritional profile in your cat's diet, with animal proteins having the highest biological values (BV) as compared to grains, fruits and vegetables. Dr. Elsey's cleanprotein helps promote a healthy, active lifestyle for all cats.

Making the Healthy Choice - The Proof Is in the Protein

As cats age, they absorb and metabolize protein less efficiently – therefore, it's extremely important to feed high quality protein. High protein can help maintain lean body mass and support a healthy immune system.

High Protein Optimizes Body Condition

High levels of protein help satisfy your cat's appetite to maintain a healthy body weight. Protein is metabolized slower than other nutrients so the result is an appetite that is satisfied longer.

Feeding Guidelines: Feed as a treat or reward. Enhance your cat's meal by mixing a small amount in with your cat's current food for enhanced flavor and nutrition. Remember to always provide a source of clean, fresh water for your cat(s).

Calorie Content (calculated) ME: 3155 kcal/kg, 3 kcal/treat
